# Details

## Online Crowded Bike Racing Game

We've created a whole new bike racing game. players will feel like the pudding is tangled up and messed up. This new game is always fun, whether you are a player or a non-player.

## Variety of operability using game pad

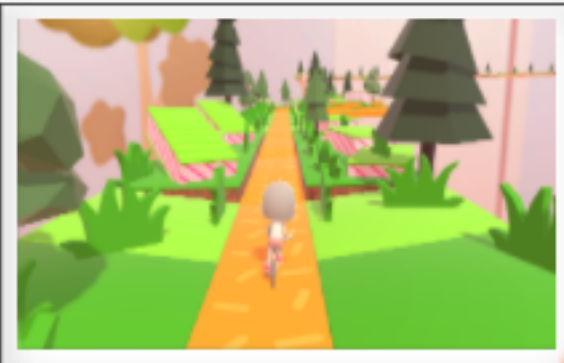

The handlebar-type game pad applied to this indoor bicycle provides the same operability as a console game device. While playing the game, you may forget even the fact that you are pedaling.

## Smart exercise management system

You don't need to consciously touch the sensor to check your status. It automatically analyzes your heart rate and exercise while playing the game. Our system not only analyzes your workout status, but also recommends optimized workouts for you.

# Game Features

- 1** Enjoyable operability at the level of a console game
- 2** Crowded online bike racing game
- 3** Interactions that provide visual enjoyment
- 4** Strategic stamina system based on bicycle movement characteristics

# Health Management Application

## Personalized Exercise Coaching

Don't worry! No matter!  
However you work out your smart app helps you  
do exercise efficiently.

### Customized Training Mode

We recommend training that suits  
your physical strength  
using an analysis individual  
kinetic ability.

Coaching while you are exercising,  
we help you to exercise  
systematically.

# Health Data Analysis **Smart Exercise** **management system**

You don't need to consciously touch the sensor to check your status. It automatically analyzes your heart rate and exercise while playing the game. Our system not only analyzes your workout status , but also recommends optimized workouts for you.

# 30 minutes a day

## Time to be healthy for the whole family

If you turn the pedals while playing our game, you can already exercise for 30 minutes easier and more fun than just turning the pedals.

### Safe cycling tips

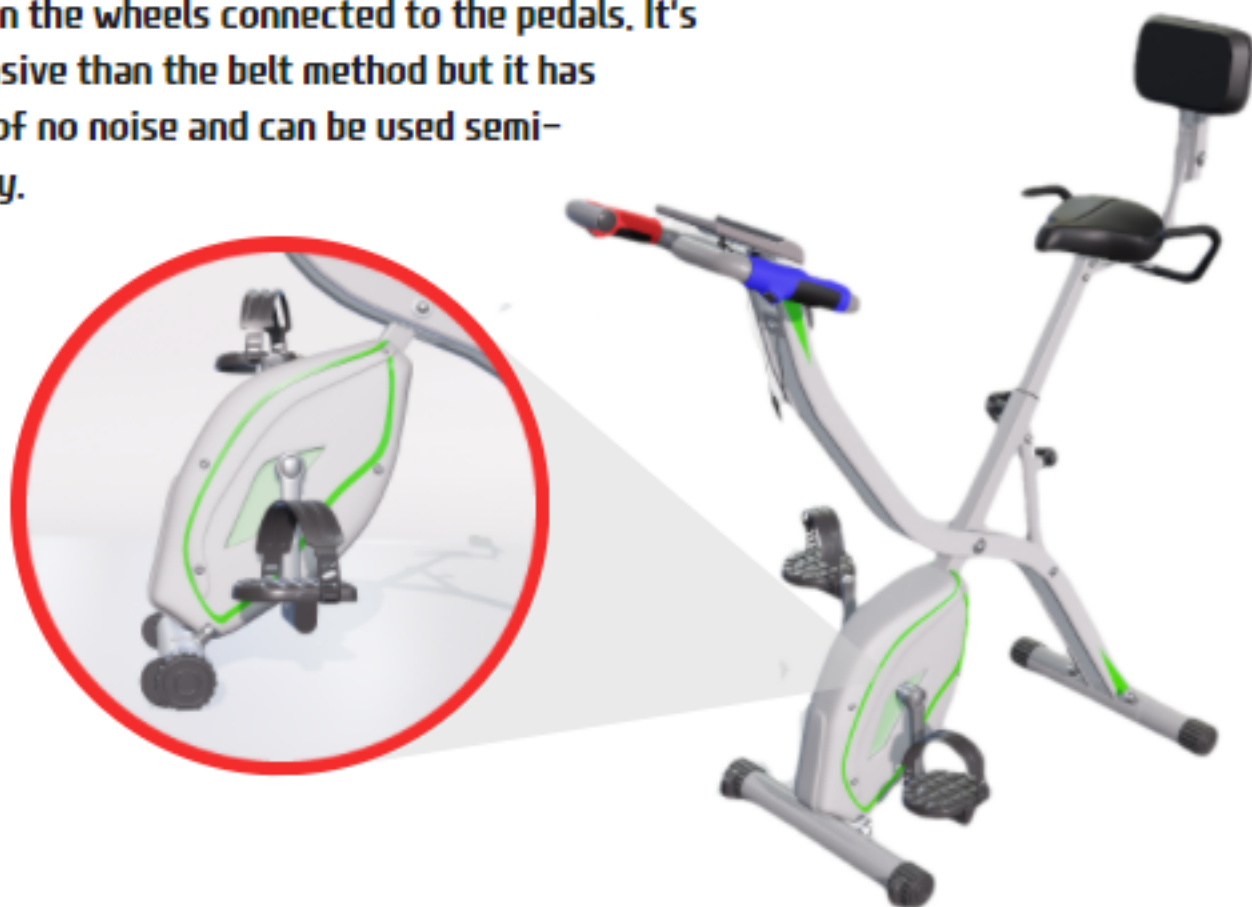

Adjust the height of the saddle to the degree that the knee is slightly bent from the pedal located on the floor.

Fasten your shoes and pedals with the straps tightly.

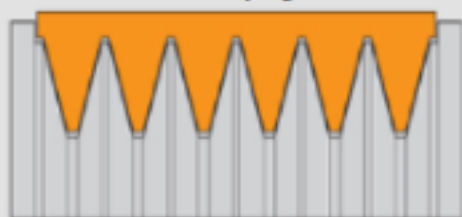

# Smooth Riding

The magnetic drum controls the pedals of strength and weakness using the magnet's force in a way that holds it on its own the wheels connected to the pedals. It's more expensive than the belt method but it has advantages of no noise and can be used semi-permanently.

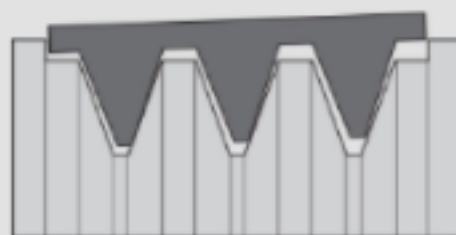

You can use it more safely because we applied the six-piece belt. No easily roller broken and not dislodged.

Section of belt and poly

**A six-inch belt**

The stable 6 piece belt can use for a long time without roller dislodge.

**A low-cost belt**

The low-cost belt may occur derailment because of the small contact area with the belt.

# Personalized Adjustment Functions

The height and angle of the bicycle seat is adjustable to fit your body

The standing cycle can exercise for a long time without inconvenience. DETS can adjust the height and angle saddle, all family members can enjoy cycling in a comfortable position that fits their body.

# " Detectable Strength "

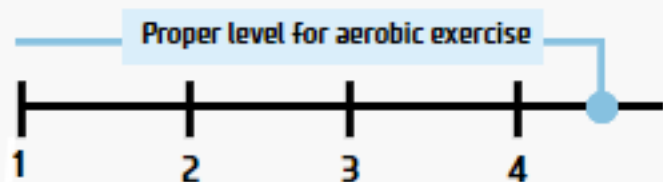

## Smart Control Lever

Strength control of the lever is subdivided into steps 1 to 8 to meet the different conditions of the user.

Moreover, while you set the strength, system can realize that level you set automatically via its smart sensor.

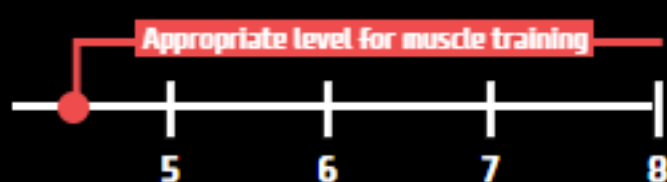

**Tip** Be able to Practice with appropriate intervals/intensity for users

« Beginners

Purpose of Muscular Exercise

For the purpose of muscular exercise, turn it slowly at a strong intensity.

Club / For seniors »

Purposes of cardio exercise

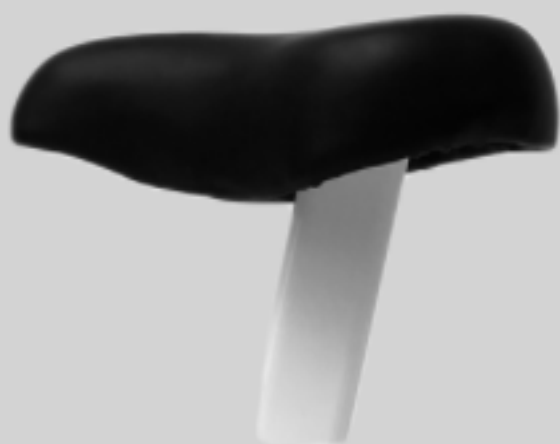

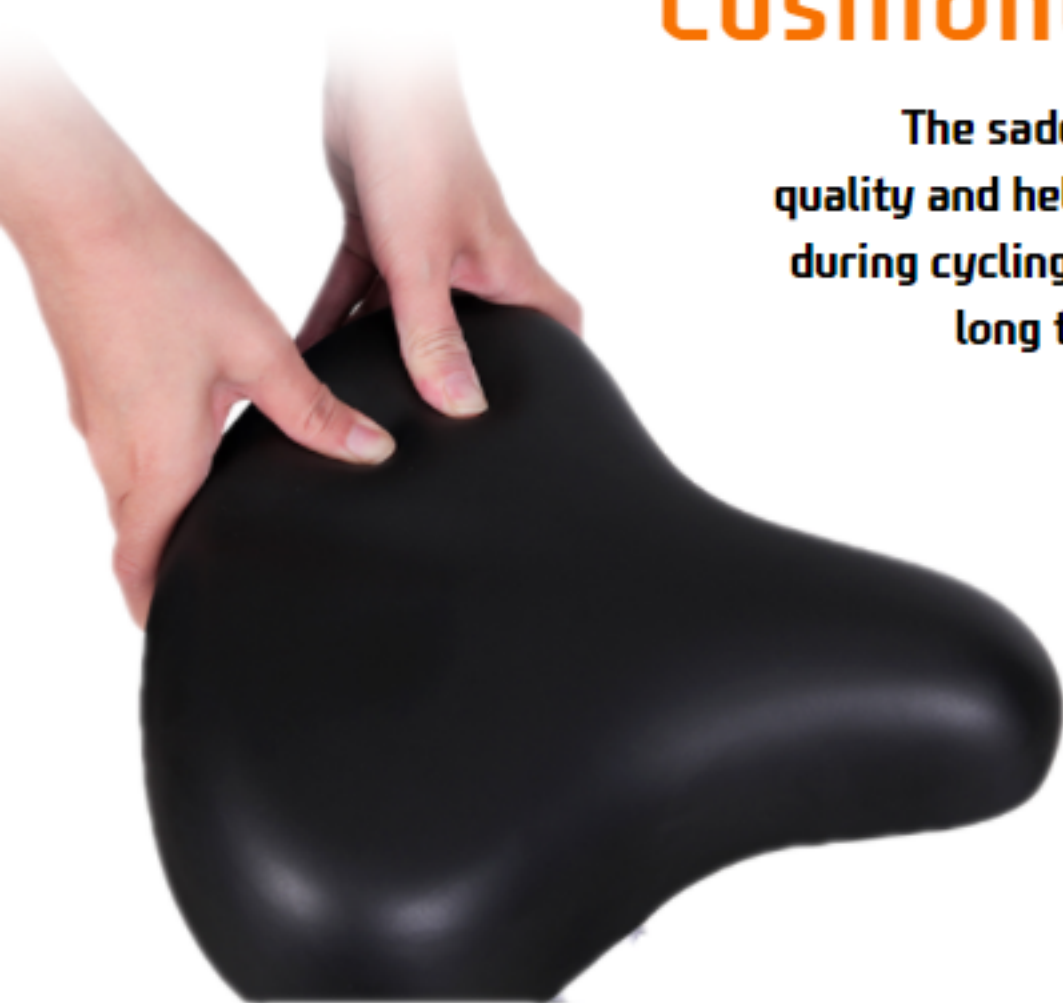

Turn the pedal at low intensity, light and fast.

# Soft and Comfortable

## High-quality Cushioned saddle

The saddle is cushiony and high quality and helps to minimize the pain during cycling. You can exercise for a long time in a stable position.

DETS cycle saddle

Our old type saddle

# Easy to move

# MOVING WHEELS!

A collapsible bicycle with two wheels on its front legs can maximize space utilization.

**Excellent grip**

# Stable Saddle

**It's a horizontal saddle that doesn't shake even after excessive exercise. You can level it anywhere. Also, when you take a rest while exercising, you can have a more comfortable rest time with a back that you can lean on.**

At DETS, the health and safety of our customers always come first
